The new generation of **UX Design** and **Full Stack** Web Development

by Jafid Garcia

Explore

Welcome! My name is Jafid Garcia, and I am a web developer who is passionate about creating beautiful and functional websites that help businesses and individuals succeed online.

Over the past few years, I have honed my skills in web development, mastering various programming languages such as HTML, CSS, and JavaScript. I also have experience working with popular frameworks like Bootstrap and VueJS, and I am always eager to learn new technologies and tools to enhance my skills.

What sets me apart from other web developers is my keen eye for design. I believe that a website should not only be functional but also aesthetically pleasing, and I work tirelessly to ensure that every website I create is visually stunning and user-friendly.

If you are looking for a dedicated and skilled web developer to help you bring your website vision to life, look no further. Let's work together to create a website that will help you achieve your goals and stand out in today's digital landscape.

Recent

Work

I am proud to share some of my recent work, which showcases my skills in web development and design. From customizing WordPress themes to building responsive websites from scratch, I have had the pleasure of working with a diverse range of clients and industries.

My recent projects include a fully responsive e-commerce website for a local fashion brand, a sleek and modern website for a tech startup, and a customized WordPress website for a non-profit organization. Each project presented its own unique challenges, and I am proud to say that I was able to deliver exceptional results that exceeded my clients' expectations.

**Technologies:** HTML, CSS, SCSS, JavaScript  
Bootstrap, Git, Netlify, Webpack, Photoshop, XD

Adventure Sports Media needed a website to showcase their abilities and services to potential clients and companies. Because of their niche clientele, we conducted extensive User Research to ensure we designed and developed an optimized website for them.

We began with a competitor analysis to understand the current market for action sports photography websites. We then conducted surveys to create user Persona's to identify the needs of potential users. Once we understood which elements would work best for this website, we created Wireframes and conducted Navigation Testing to ensure a frictionless user experience.

In order to code to the client design we used a combination of customized SASS and Bootstrap to create grid layout elements and functionality for the website throughout its responsive display sizes. One of the challenges for this project was customizing Bootstrap classes to be different for Mobile displays vs Desktop displays by changing the parameters of the hamburger menu collapse class to cover the entire screen size rather than just the standard small dropdown menu card that Bootstrap provides.

```
position:static !important;
text-align: center;
}

.navbar-collapse {
  box-shadow: 0 .5rem 1rem rgba(0, 0, 0, .15)!important;
  margin-top:0px !important;
  width:100% !important;
  height: 100vh !important;
}

.dropdown {
  position:static !important;
}

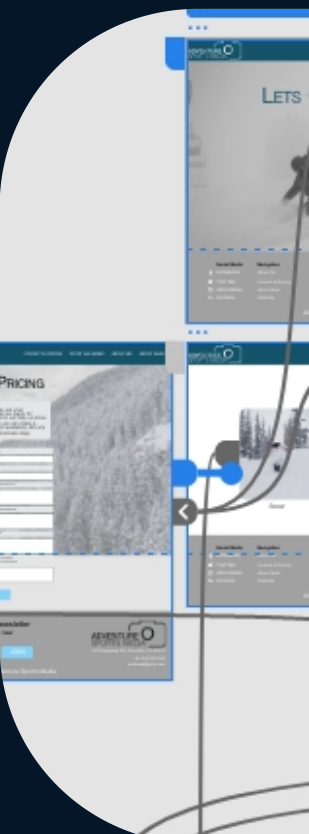

.dropdown-menu {
  text-align: center;
  font-size: 2rem;
  box-shadow: 0 .5rem 1rem rgba(0, 0, 0, .15)!important;
  margin-top:0px !important;
  width:100% !important;
}

.gallerySideMenu{
```

```

        justify-content-end" id="navbarSupportedContent">
        2 mb-lg-0 justify-content-end">
        nav-item">
        is="nav-link active link-light" href="/components/contact_price.html">CON
    ) down sub gallery menu -->
    is="nav-item">
    lass="btn-group galleriesButton">
    itton onclick="window.location.href='/components/galleries.html';" type="
    itton type="button" class="btn text-white btn-transparent dropdown-toggle
    a-bs-toggle="dropdown" aria-expanded="false" data-bs-reference="parent">
    span class="visually-hidden">Toggle Dropdown</span>
    utton>
    class="dropdown-menu">
    <li><a class="dropdown-item" href="/components/snow.html">Snow</a></li>
    <li><hr class="dropdown-divider"></li>
    <li><a class="dropdown-item" href="/components/mtb_bmx.html">MTB/ BMX</
    <li><hr class="dropdown-divider"></li>
    <a class="dropdown-item" href="/components/surf.html">Surf</a>
