Portfolio gallery (thumbnails & captions)					X
Portfolio reflections/description pages					X
Contact page				X	
Reflections (description of portfolio pieces)					
Content of reflections appropriate					X
Project images are high quality					X
Spelling and grammar are correct				X	

What was your overall first impression of the website?

I loved the name (JStacked) and I loved the video. I assumed it was a stock video, but then realized it was you. Nice touch to show yourself coding as the main portion of your home page. Introduces you and your skills.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?
Scrolling the main page, it was a bit slow to add the About graphic and content. I'd see what you can do about that. Lazy loading is nice, but it was a little annoying. Can you compress the video any? I tried reloading the page and using the links and they don't function until the video loads. Cool feature, but it's slowing download times.

Tried to load Lens of JG proposal and it wasn't found.

What do you feel are the most effective design elements of this web portfolio?
I love the dark color scheme. The animations are subtle and add personality. Layouts are consistent across project pages. Though, images on 01 seemed out of order.

What would you suggest be changed with the design or content of this web portfolio?
I feel like "let's work" is missing something in the title. Maybe changing it to "let's connect" would help? I just feel like work wants "together" after it. Just a minor thing.

I kept checking the contrast of your foreground/background because they felt a bit too low. They always checked out, but that doesn't mean they are good for all users. I don't know that you need to do anything about it, just be aware that the gold feels hard to read. It's not really contrast (as it's a 6:1 ratio) but it could be because the feel like they fight against each other a bit. I still really love the color scheme as a whole.

I did find a button that took me nowhere, so see that under technical issues and fix.

Because of the large file size of your video anytime I navigate back to the main page, it takes me to a blank screen for about 10–20 seconds. (That's a guess, I didn't time it.)
